

Francisco's Phone Book

This program allows you to keep all of your contacts in one place with the ability to add their name, email, number, and address, along with the ability to delete or view your contact whenever you want.

In order to use this you first begin the program and start by entering the information you have for your contact and once you are finished entering the information you simply click add.

Once you click add the contact will be saved to the box below and you can add another by simply typing in more info to the now empty boxes and then clicking add when you're done.

Once you would like to view your contact info all you have to do is click on the contact you want to see and click 'See Contact Info.'

If the time comes where you simply need to delete a contact all you have to do is click on the contact you want to delete and simply click the "delete contact info button."

Once you are all done with this program you can exit by either clicking the red "exit" button or simply closing out how you would any other application.
